

Breastfeeding Supplies and Pump Rental

248-937-4180

Huron Valley Sinai Hospital, Karmanos Lobby

Monday - Friday 8 - 4pm

Symphony Pump

\$80.00 per month

Weekly rates available on request

Research shows that babies have two nursing rhythms—an initial, rapid rhythm to promote let-down, then a slower, deeper rhythm once the milk is flowing. The Symphony Pump automatically matches this expression pattern and is the most comfortable Medela breast pump available for use.

Why rent a hospital grade breastpump? Not all breastpumps

are the same! A hospital-grade quality breast pump is the most efficient pump for initiating and maintaining milk supply. This is especially true if your baby is premature, ill and/or unable to latch during the first postpartum days. Because a hospital-grade electric breastpump can be expensive to purchase, rental allows a mother to rent a quality breastpump at a reasonable rate without spending a large amount of money to purchase a similar product.

Other items available for purchase:
